

Join us at the *DIA Annual Canadian Meeting* for key insights into Canada's broader role in global healthcare product development!

HEALTHCARE  
HOSPITAL  
PATIENT

## KEY R2D2 TOPICS TO BE DISCUSSED

NEW PATHWAYS  
TO MARKET  
DRUGS

OPPORTUNITIES  
WITH MEDICAL  
DEVICES

CLINICAL TRIAL  
DESIGN

PATIENT  
ENGAGEMENT

PERSONALIZED  
MEDICINE

NEW  
TECHNOLOGY

## MORE REASONS TO ATTEND

### Three Tracks

A

#### Regulatory

- Updates from Health Canada's international collaboration efforts with ICMRA, ACSS, and more
- Overview of Health Canada's new Public Release of Clinical Information (PRCI) initiative
- Outline of current policies to align Health Canada and the Health Technology Assessment (HTA) reviews

B

#### Clinical

- Key trends of convergence for Health Canada's clinical trials across all healthcare product classes
- Health Canada's view of the use of real world evidence in regulatory decision-making
- Details on how the use of innovative trial designs can improve outcomes for drug development

C

#### Medical Devices

- Perspectives on challenges and opportunities in medical device development
- Details on how Software as a Medical Device (SaMD) is impacting device classification and use cases

**REGISTER TODAY**

## HIGHLIGHTS

#### Keynote Address

on the measurable actions the Economic Strategy Table developed for new models of government-industry engagement in order to achieve the vision of doubling the size of the Canadian health and biosciences sector

**Networking  
Reception**

**Exhibit  
Hall**

**DIA Community  
Round Tables**
